

TO WHOM IT MAY CONCERN

S B PROJECTS – Office Fitout

Mr Bryan Palmer of S B Projects was responsible for the project management and building of the fit out of our firm's new premises at level 6, 68 Pitt Street, Sydney during March/April 2009.

The project was completed by the S B Projects team on time and within our budget. S B Projects worked closely with our designer to finalise design details that inevitably arise on these projects within a tight time frame and they achieved a high standard of finish in the final product, reflecting the brief.

At all times the S B Projects team worked well with myself as the client and with our designer and proved their commercial focus in their attention to budgetary and time limitations. Their attitude towards the project was always that nothing is a problem and this was borne out by the results.

S B Projects was also responsible for the project management of the make good in respect of our old premises in Bathurst Street and achieved the same high standard of professionalism and the relevant budgetary and time limitations with that job.

I would highly recommend Bryan and S B Projects for similar projects and would be happy for anyone considering using their services to inspect their work for our firm.

Yours faithfully
HARRIS & COMPANY
