TO WHOM IT MAY CONCERN

Re: SB Projects

In August 2013 we engaged Bryan Palmer of SB Projects to deliver a small office fit out of Suite 1002 of the South Tower building of Chatswood Central. We were moved into the office over the long weekend in October and the works were completed soon after.

We provided Bryan with minimal documentation – a few hand drawn diagrams and lots of verbal discussion about what we wanted. Bryan was able to convert our ideas into a workable and cost effective fit out.

He was able to advise on things we should do and shouldn't do and we ended up with a much better result from following his advice. Bryan knows his stuff and we really appreciated his guidance throughout the process.

In terms of execution, he delivered the project as he said he would. The components were delivered and installed over a few weeks, including both glass and solid partitions, considerable electrical work and cabling, frosting for the glass and compulsory requirements such as an additional exit sign.

The end result far exceeded our expectations. Whilst our office is only 65 square metres in size, it is perfect for our small team and the partitions ensure that the work areas are functional and comfortable for all. The quality of the work done was flawless.

I can thoroughly recommend Bryan and his team to anyone who would like to embark on an office fit out project.

Yours sincerely,

Geoff Taylor MBA CPA
